3 | INTRODUCTION

The following guidelines have been developed to assist with the successful application of the IDmeta branding.

Maintaining consistency in all forms of communication is paramount to the success of the brand.

Language

Values

The IDmeta brand values are a set of guiding principles that shapes every aspect of the business. They are the core beliefs that determine our brand’s identity, message and personality.

Tagline

A strong tagline makes a business noticeable and creates a lasting impact in the minds of our customers.

The following tagline has been created for use across all IDmeta communications.

Tagline

Establish trust with the first click.

Guidelines

Logo Family	Social Avatar Variations

Secondary Logo Variations	Colour Ratio
Alternative Logo	Typography
Alternative Logo Variations	Photography
Brandmark	Gradients
Brandmark Variations	Digital
Social Avatar	Print

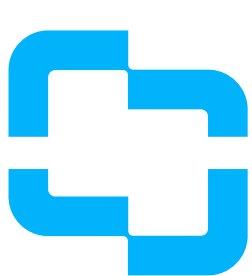

Primary Logo

Secondary Logo

Alternative Logo

Brandmark

Primary Logo

This primary logo is to be used across all core brand applications. This helps audiences easily identify the IDmeta brand and enhances the professionalism of the business.

It is essential to the success of the brand that the primary logo always be applied with care and respect in every application according to these guidelines.

Primary Logo Variations

The Primary Logo should only be used on a white or light background.

The Primary Logo Reverse should only be used on a Midnight Blue or dark background.

If your background is Sky Blue or Data Violet, you should use the Primary Logo Mono.

Consistent and clear use of the primary logo across all marketing channels will strengthen the IDmeta image and provide an important foundation for the character of the brand.

Primary Logo

Primary Logo Reverse

Primary Logo Mono

Primary Logo Mono

Secondary Logo

Use the secondary logo as an alternative to the primary logo when you want to show the primary logo with the tagline.

It is essential to the success of the brand that the secondary logo always be applied with care and respect in every application according to these guidelines.

IDmeta
Establish trust from the first click.

Secondary Logo Variations

The Secondary Logo should only be used on a white or light background.

The Secondary Logo Reverse should only be used on a Midnight Blue or dark background.

If your background is Sky Blue or Data Violet, you should use the Secondary Logo Mono.

Secondary Logo

Secondary Logo Reverse

Secondary Logo Mono

Secondary Logo Mono

Alternative Logo

The alternative logo may be used instead of the primary logo when you do not have enough room for the primary logo or to make more of the brandmark as an element.

It is essential to the success of the brand that the alternative logo always be applied with care and respect in every application according to these guidelines.

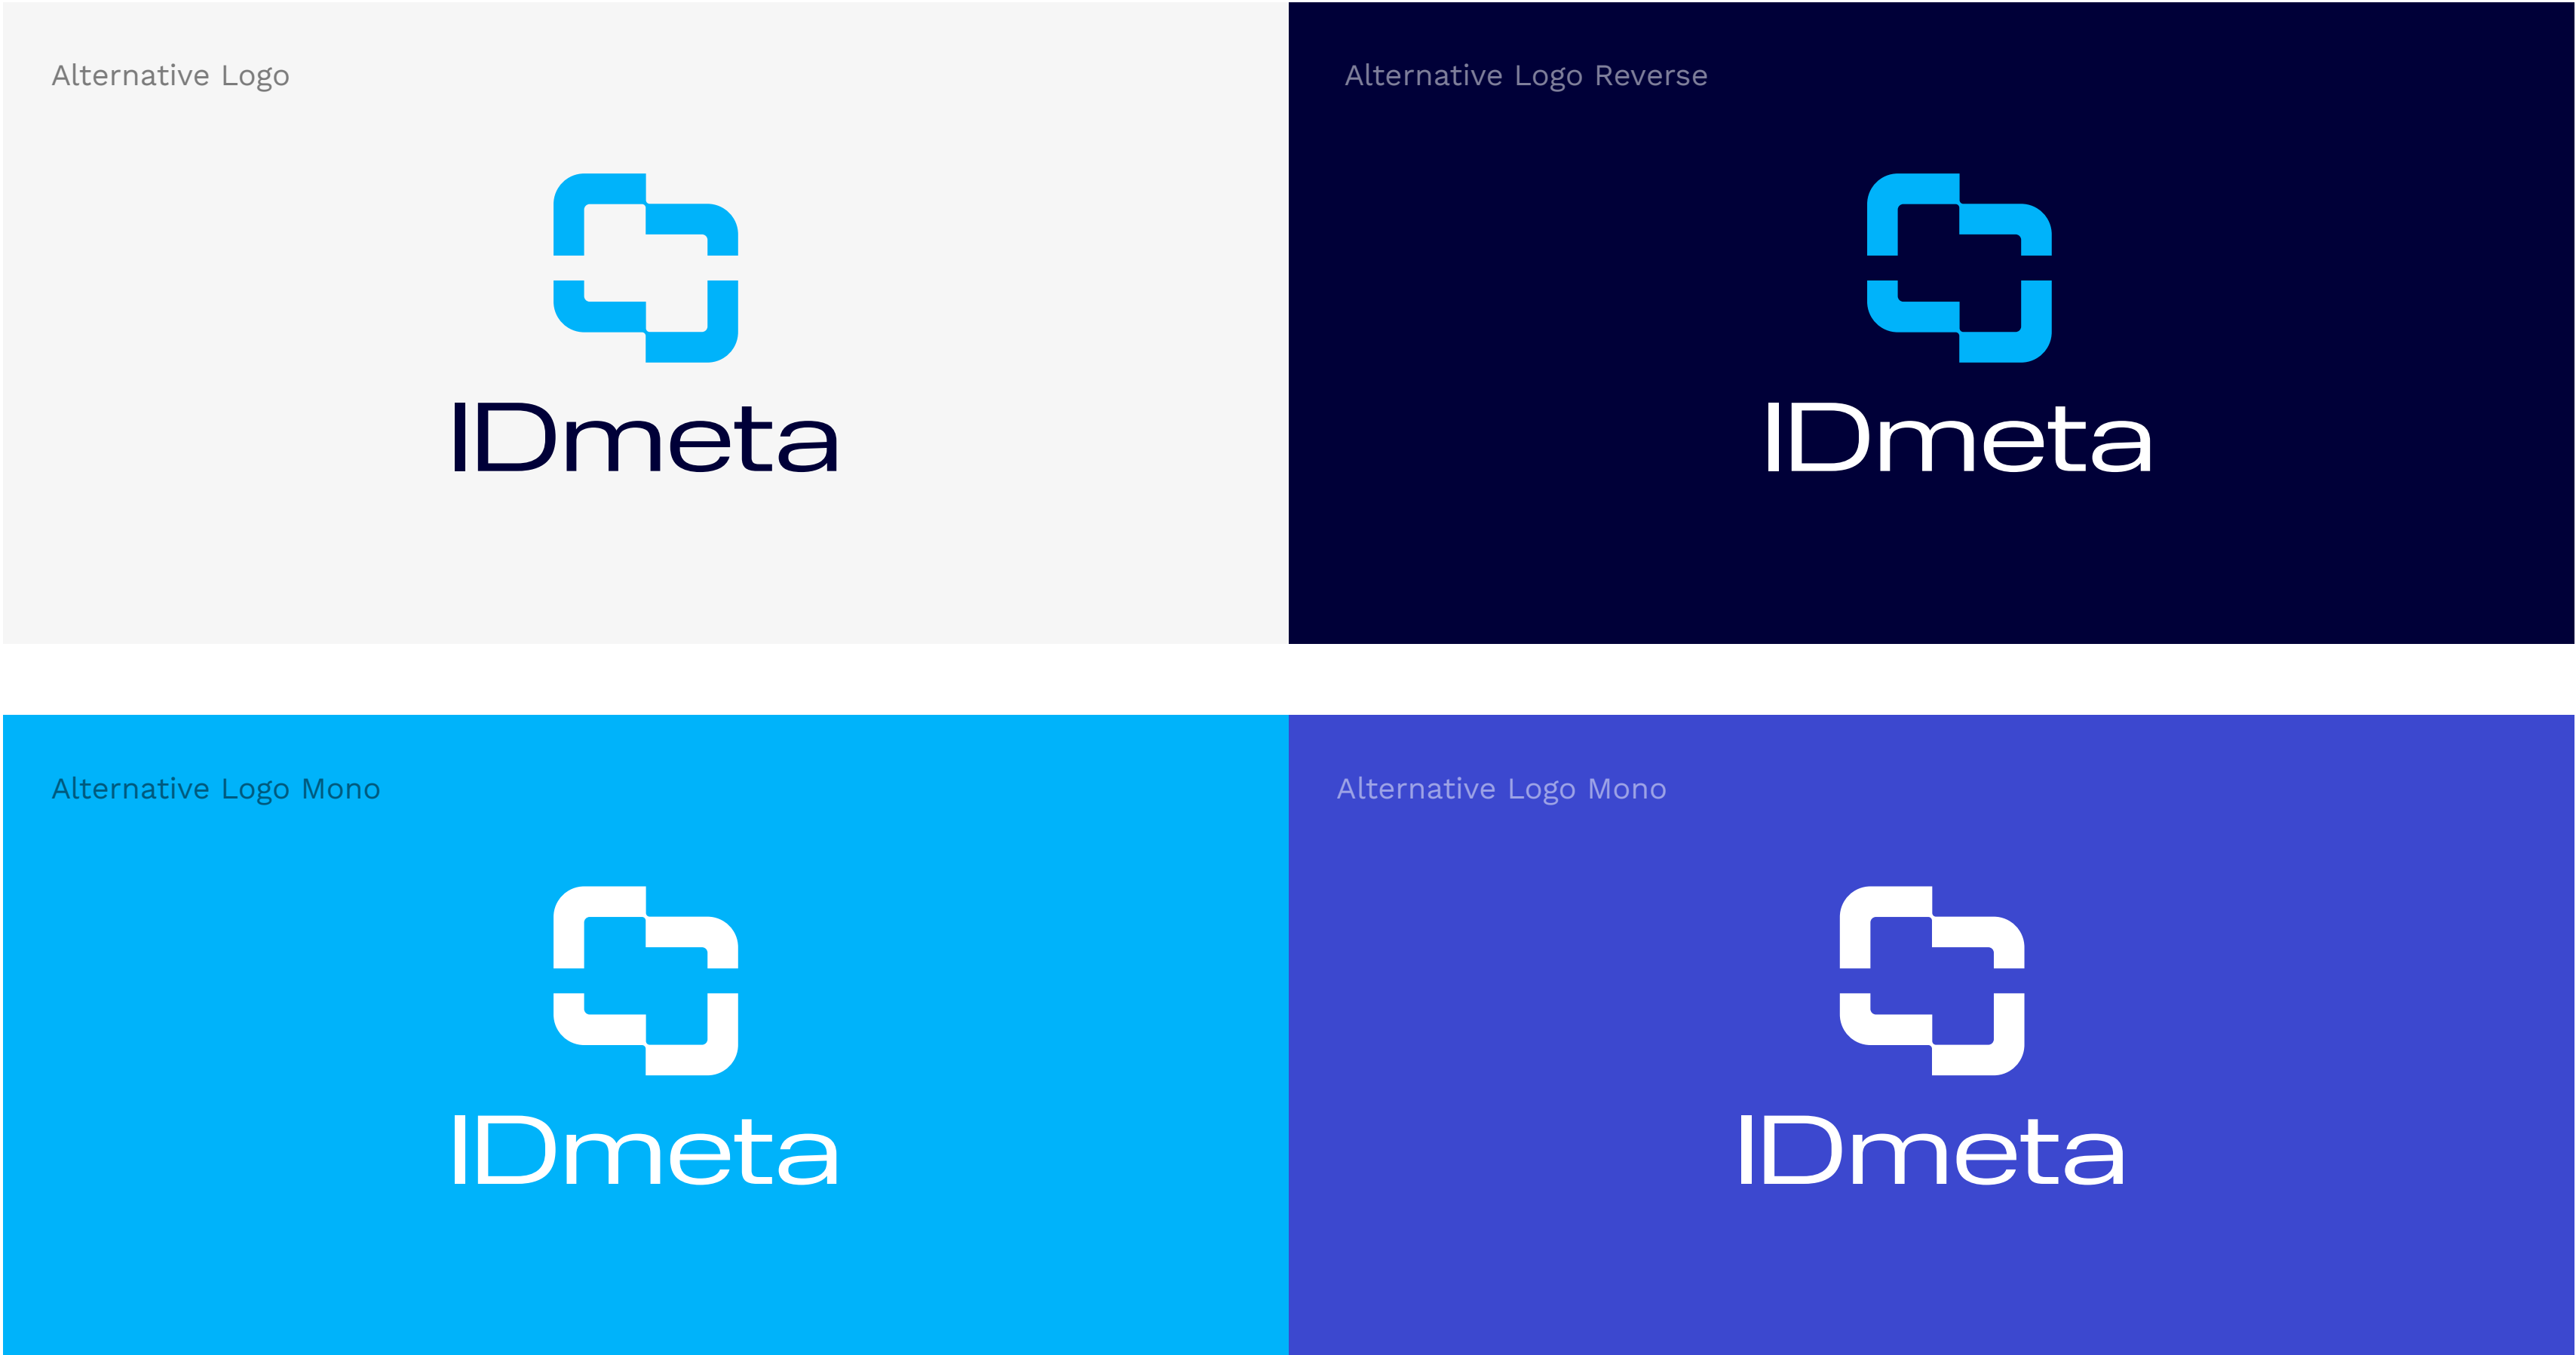

Alternative Logo Variations

The Alternative Logo should only be used on a white or light background.

The Alternative Logo Reverse should only be used on a black or dark background.

If your background is Sky Blue or Data Violet, you should use the Alternative Logo Mono.

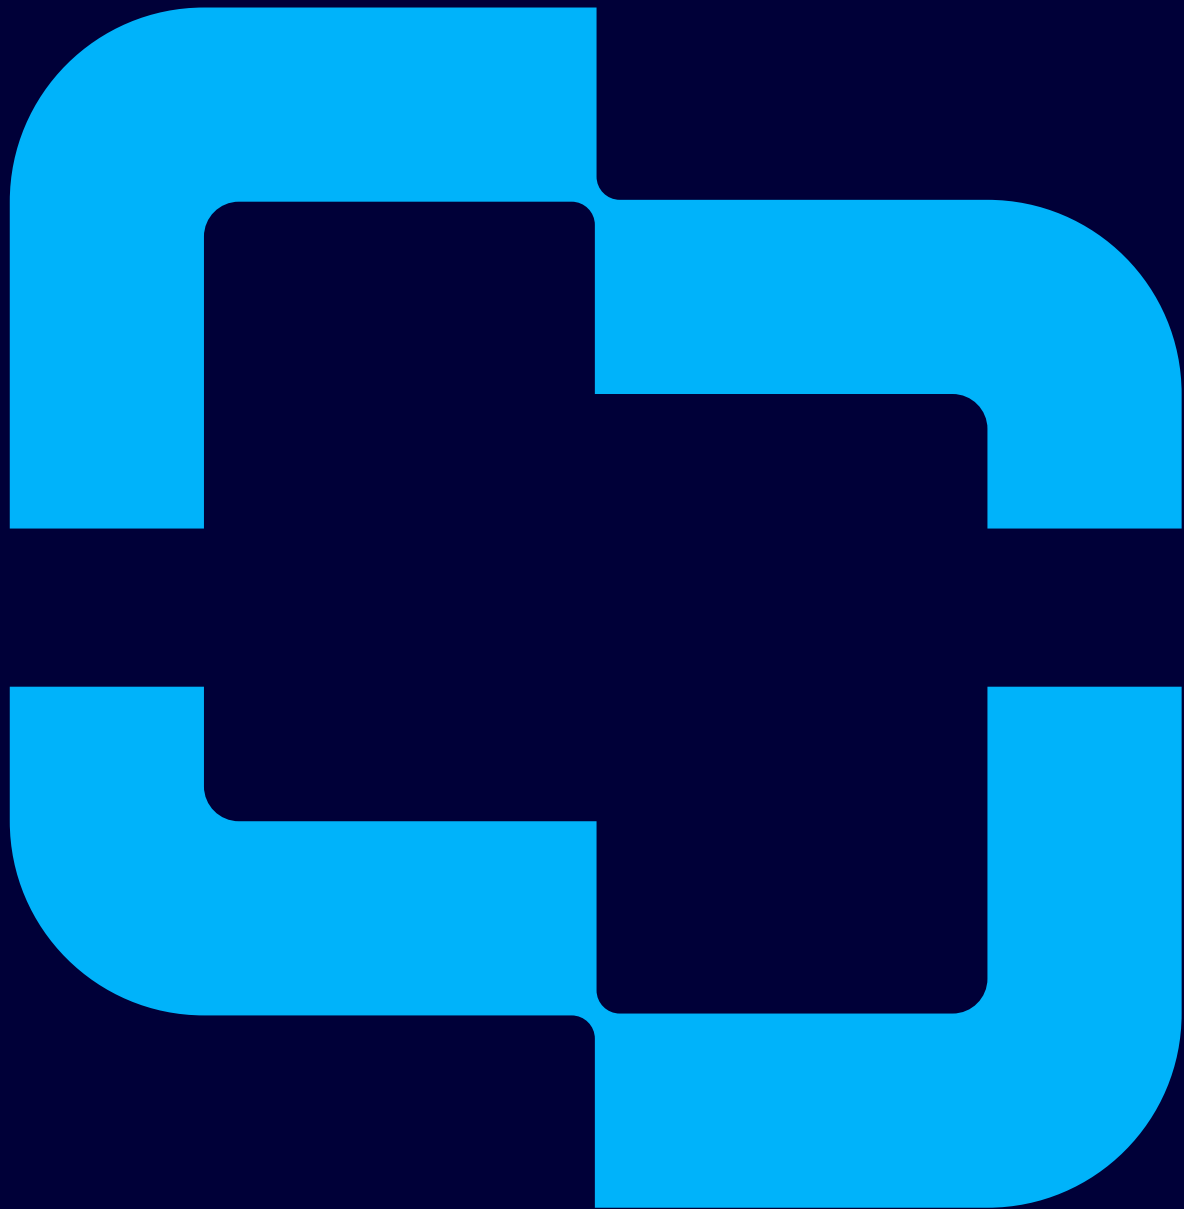

Brandmark

The brandmark is a shorter version of our logo.

The brandmark can be used where a simplified version of the logo is required, for formats where the primary logo would be illegible and in cases when the IDmeta brand has already been established.

While the brandmark can exist without the wordmark, the wordmark should never exist without the brandmark.

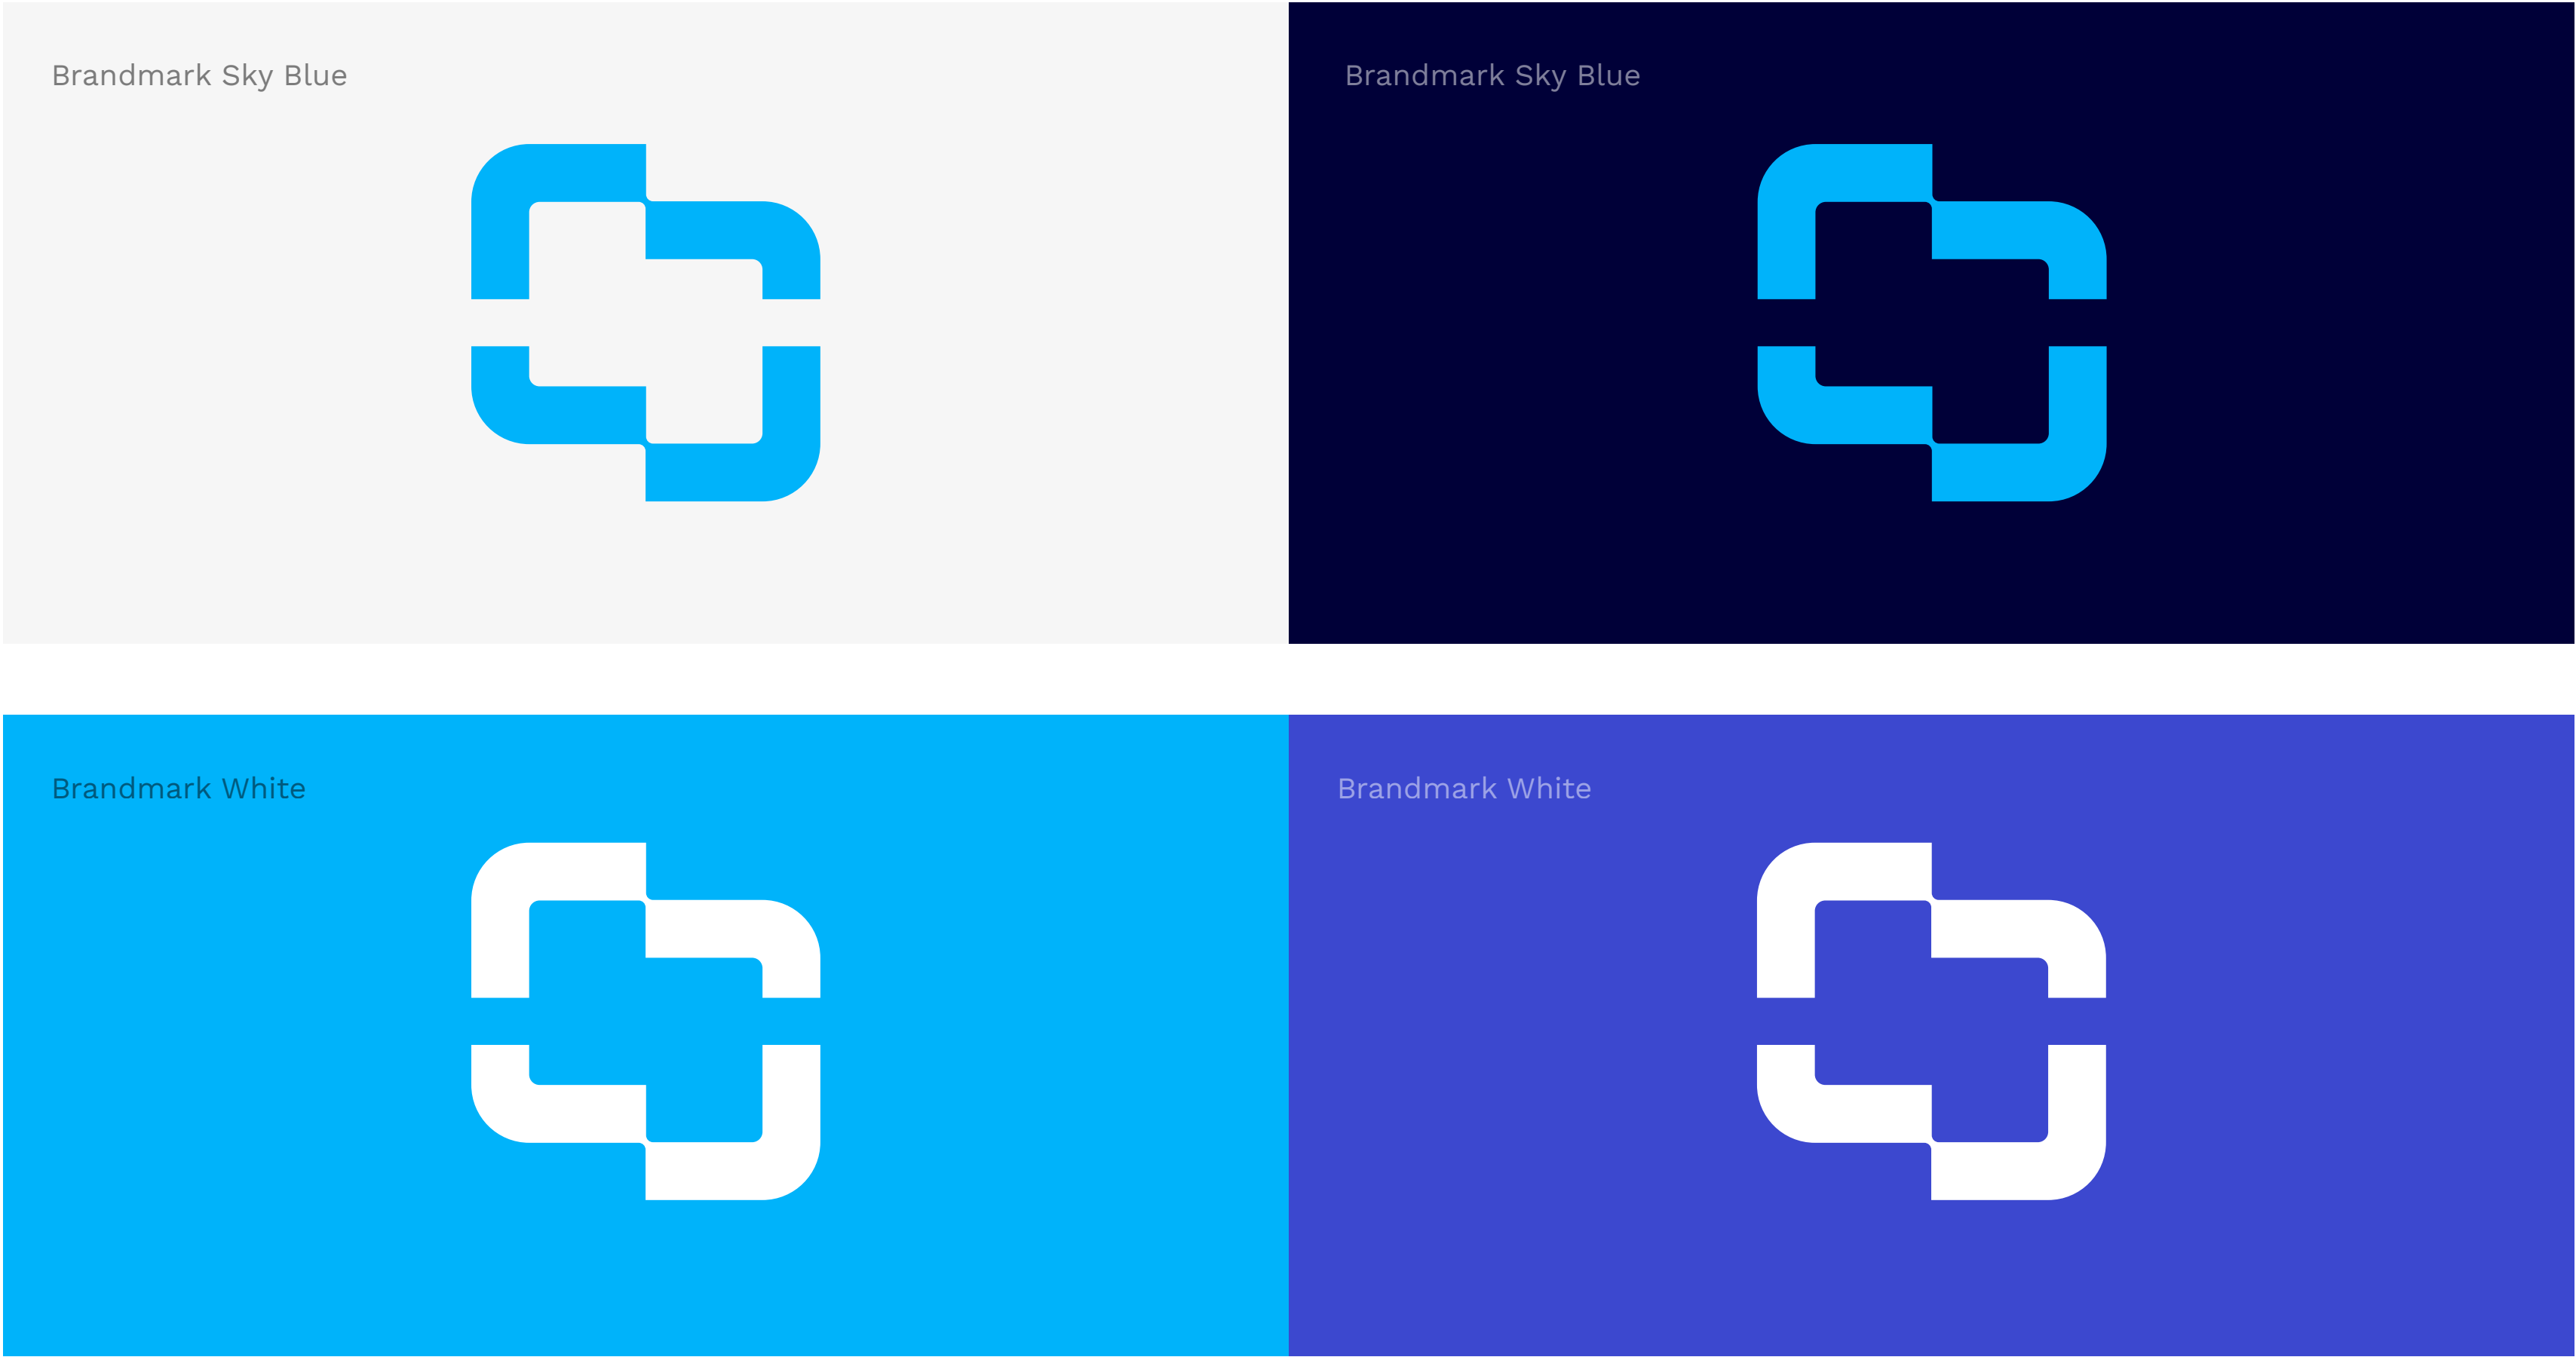

It is essential to the success of the brand that the brandmark only be applied in the relevant application accordingly.

Brandmark Variations

The Brandmark Sky Blue can be used on white/light and Midnight Blue/dark backgrounds.

The Brandmark White should only be used on a Sky Blue or Data Violet background where the Brandmark Sky Blue may be illegible.

Social Avatar

The social avatar should be used for social media profile pictures.

The background and spacing for the social avatar is predetermined by the negative space in the supplied files.

Social Avatar Variations

You should only use this one version of the social avatar across social media profile pictures.

We do not recommend using any other version of the logo for your social avatar as it will not be as legible.

Social Avatar

Logo Use

The size of the primary, secondary, alternative and brandmark space is defined by the width of the letter ‘D’.

No other graphic, text or colour must encroach on the minimum clear space area around the logo.

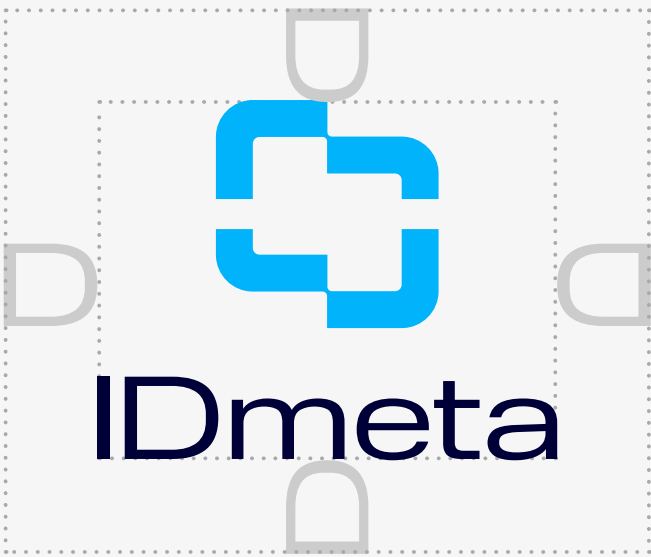

Establishing a minimum size ensures that the impact and legibility of the logo aren’t compromised.

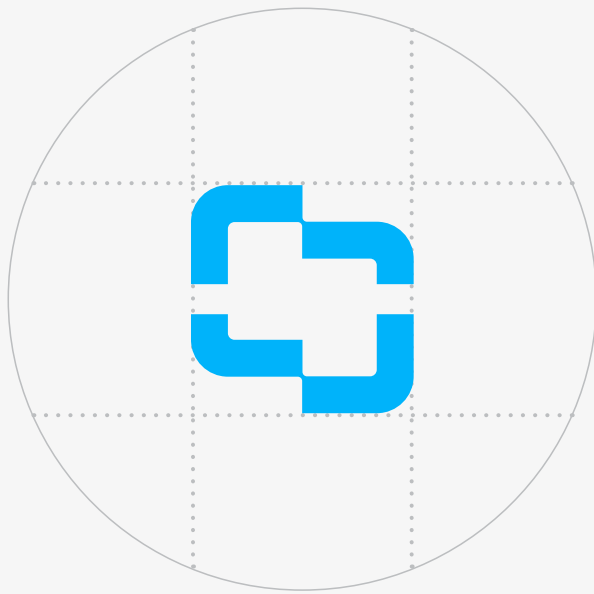

Primary Logo
Minimum width: 120px

Secondary Logo
Minimum width: 120px

Alternative Logo
Minimum width: 120px

Brandmark
Minimum width: 110px

It’s important that the appearance of the logo remains consistent to ensure the integrity of the logo and consistency of usage. The logo should not be modified or added to. Its orientation, color, and composition should remain as indicated in this document, with no exceptions.

These are examples of how **not** to use the logo:

Never:

Change the colour of the logo

Display the logo on a busy background

Resize or rotate individual parts of the logo

Distort the logo in any way

Delete any part of the logo

Crop the logo

Add additional effects the logo

Break up the logo

Place other elements in the logo clear-space

Primary Colours

Our primary colours are Midnight Blue and Sky Blue.

Colour is an integral part of the IDmeta brand identity. Consistent use of the primary colour palette will reinforce the cohesiveness and enhance the professionalism of the brand.

Sky Blue should mostly be used for digital purposes. If you must use it for print, we recommend consulting your printer first.

Secondary Colours

Our secondary colours are Slate and Data Violet.

Our secondary colours can be used in certain design applications as accents to compliment the primary colours, but should never overpower them.

Data Violet should mostly be used for digital purposes. If you must use it for print, we recommend consulting your printer first.

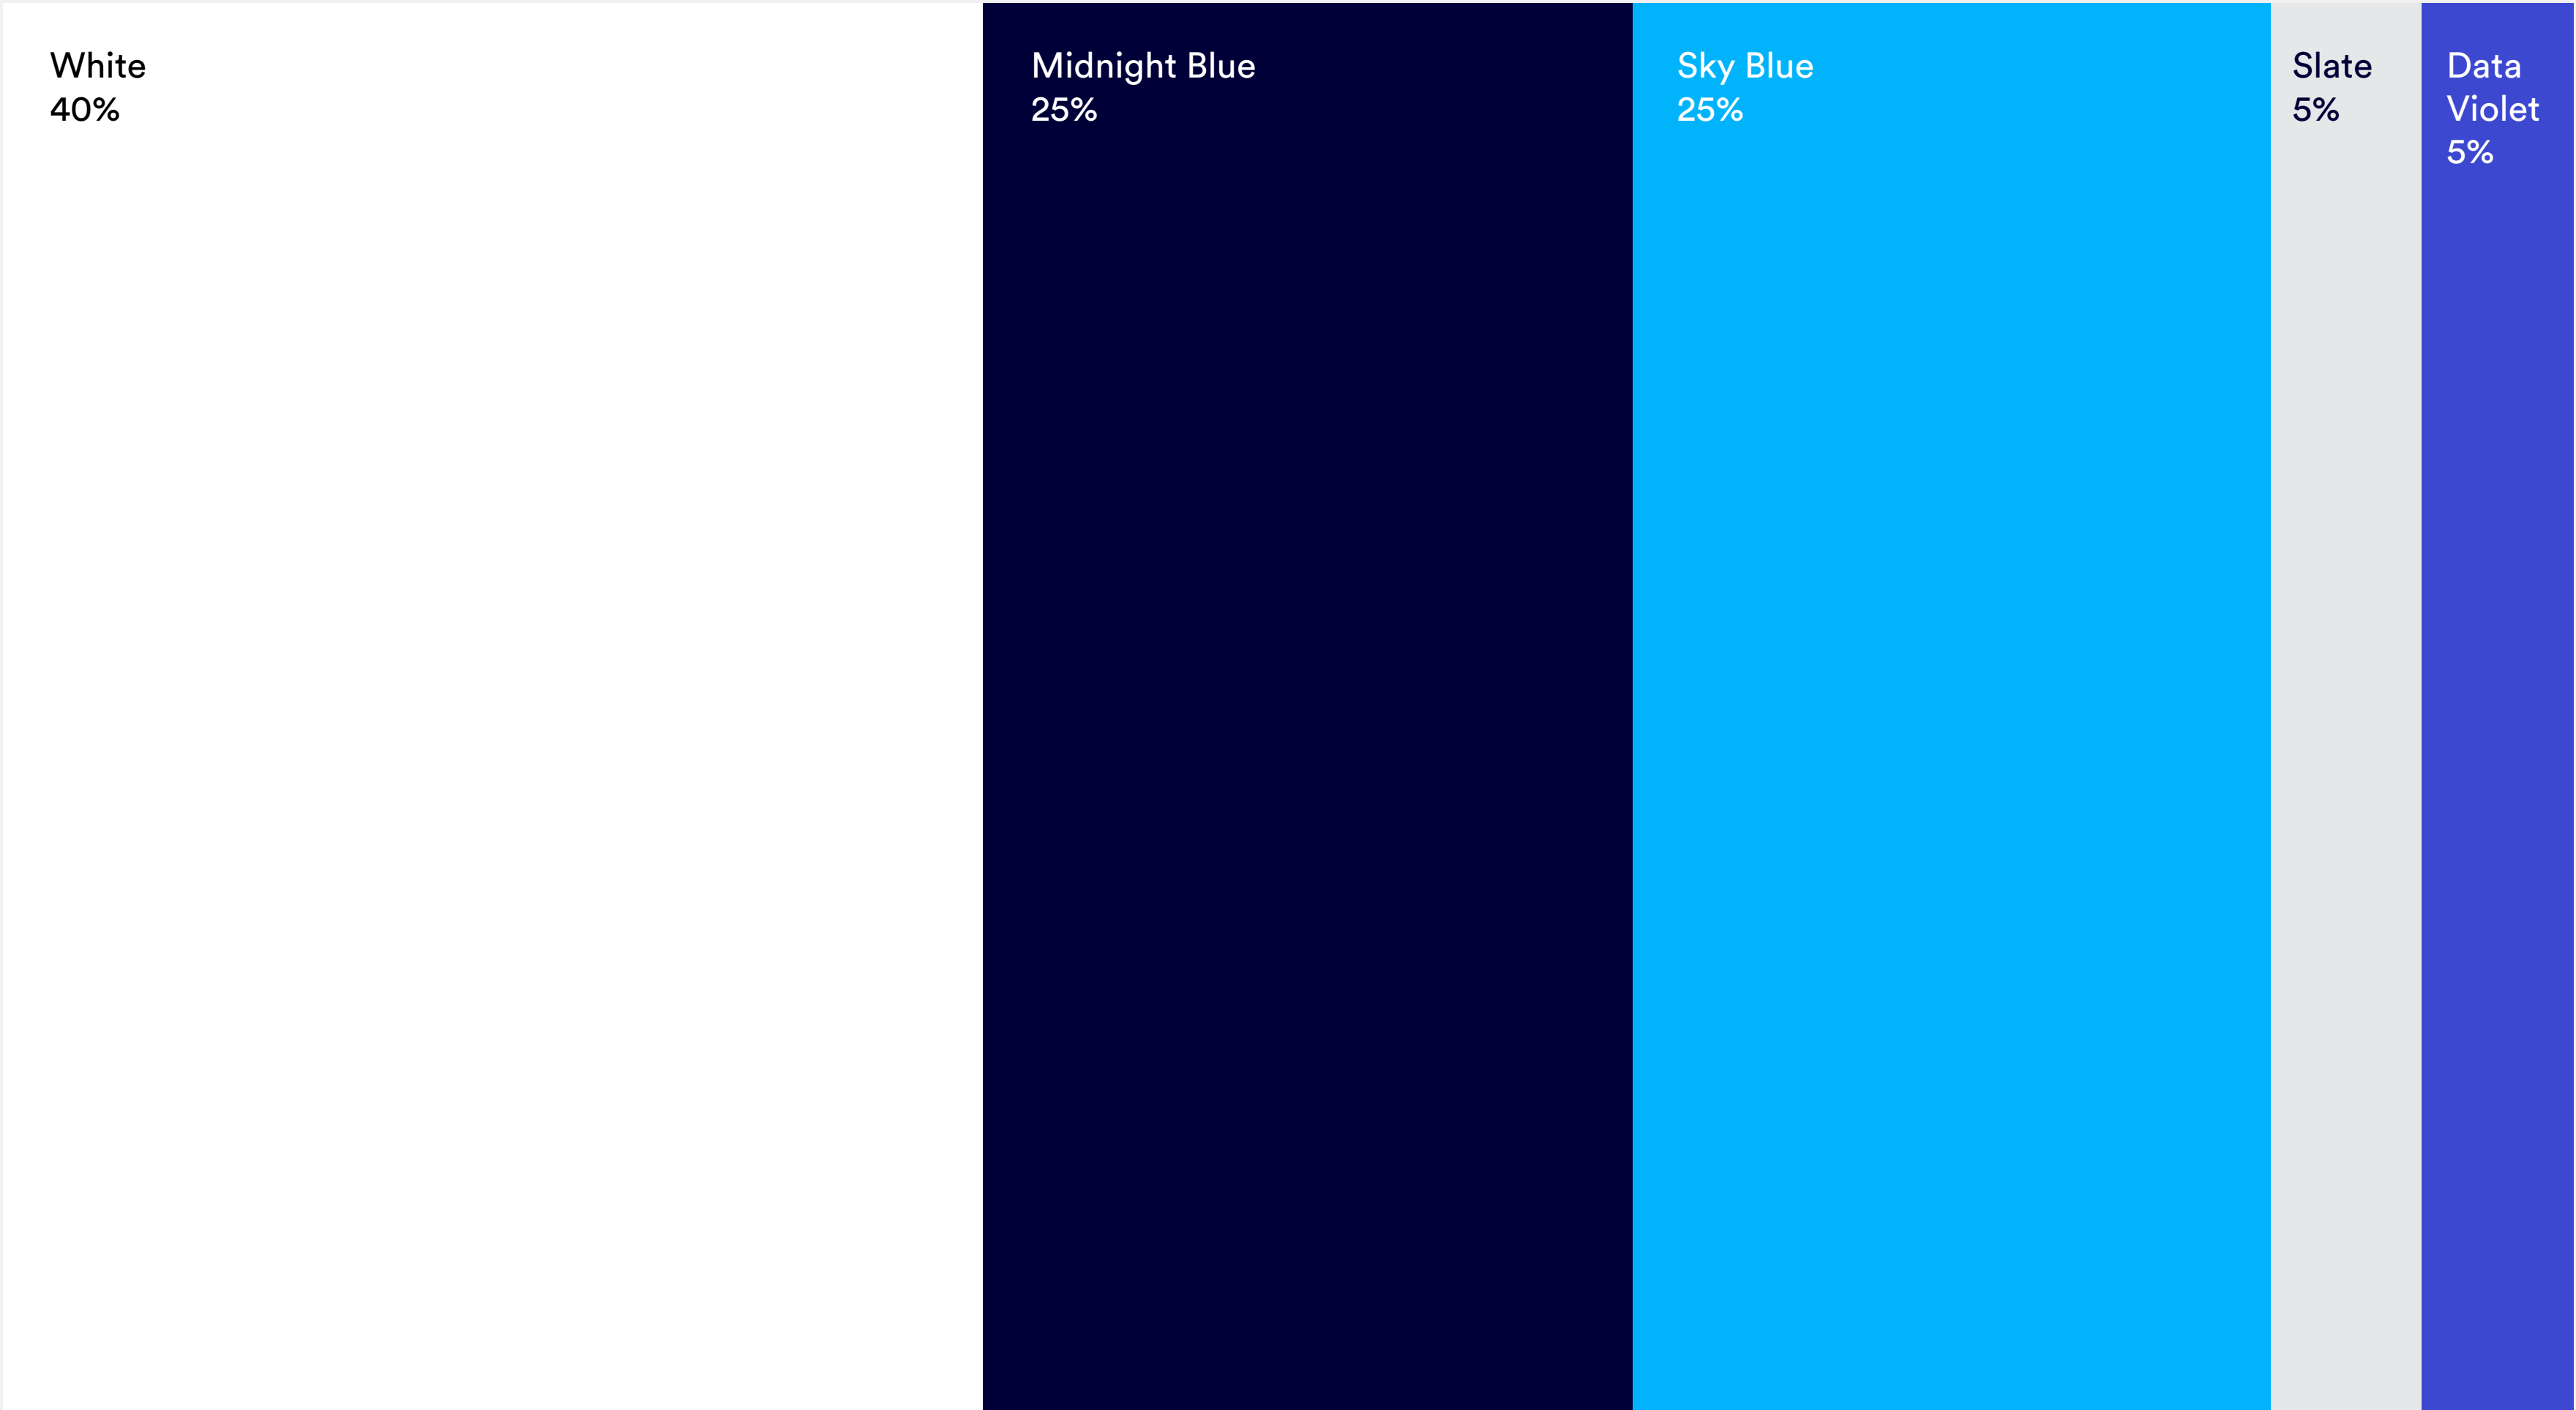

Midnight Blue HEX #000038 RGB 0, 0, 56 CMYK 97, 92, 40, 61	Sky Blue HEX #00b2fa RGB 0, 178, 250 CMYK 66, 14, 0, 0	White HEX #ffffff RGB 255, 255, 255 CMYK 0, 0, 0, 0
Slate HEX #e6e7e8 RGB 230, 231, 232 CMYK 0, 0, 0, 10	Data Violet HEX #3c48cf RGB 60, 72, 207 CMYK 82, 76, 0, 0	

The recommended colour splits for RGB and CMYK are provided and should be manually re-created in Adobe software where appropriate.

Colour Ratio

It’s integral to the success of the brand that the brand colours are used in this specified ratio.

White, Midnight Blue and Sky Blue should be used predominantly across all design layouts, with Slate and Data Violet to be used as accents where appropriate.

Headline Font

Sora Semibold should be used for all headlines across print and digital artwork.

AaBbCc

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()

Subheading Font

Sora Medium should be used for subheadings across print and digital artwork.

AaBbCc

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()

Body Font

Our supporting typeface is a contemporary font called Work Sans Regular. It is to be used across web and print for all body copy and fine print applications.

AaBbCc

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!@#\$%^&*()

Your customers.
Your way.

Peace-of-mind verification

idmetagroup.com.au

Photography

The core of what we say and do should be depicted by the imagery we use.

The imagery used should be abstract photography depicting the digital verification market, buildings and people.

The imagery should be applied to best suit the specific layout and copy.

In regards to photography specifications, there should be a mix of:

- Light and dark
- Colour and black and white
- High contrast

Gradients

There are two variations of the brand gradient: Gradient 1 (Midnight Blue/ Data Violet) and Gradient 2 (Data Violet/Sky Blue).

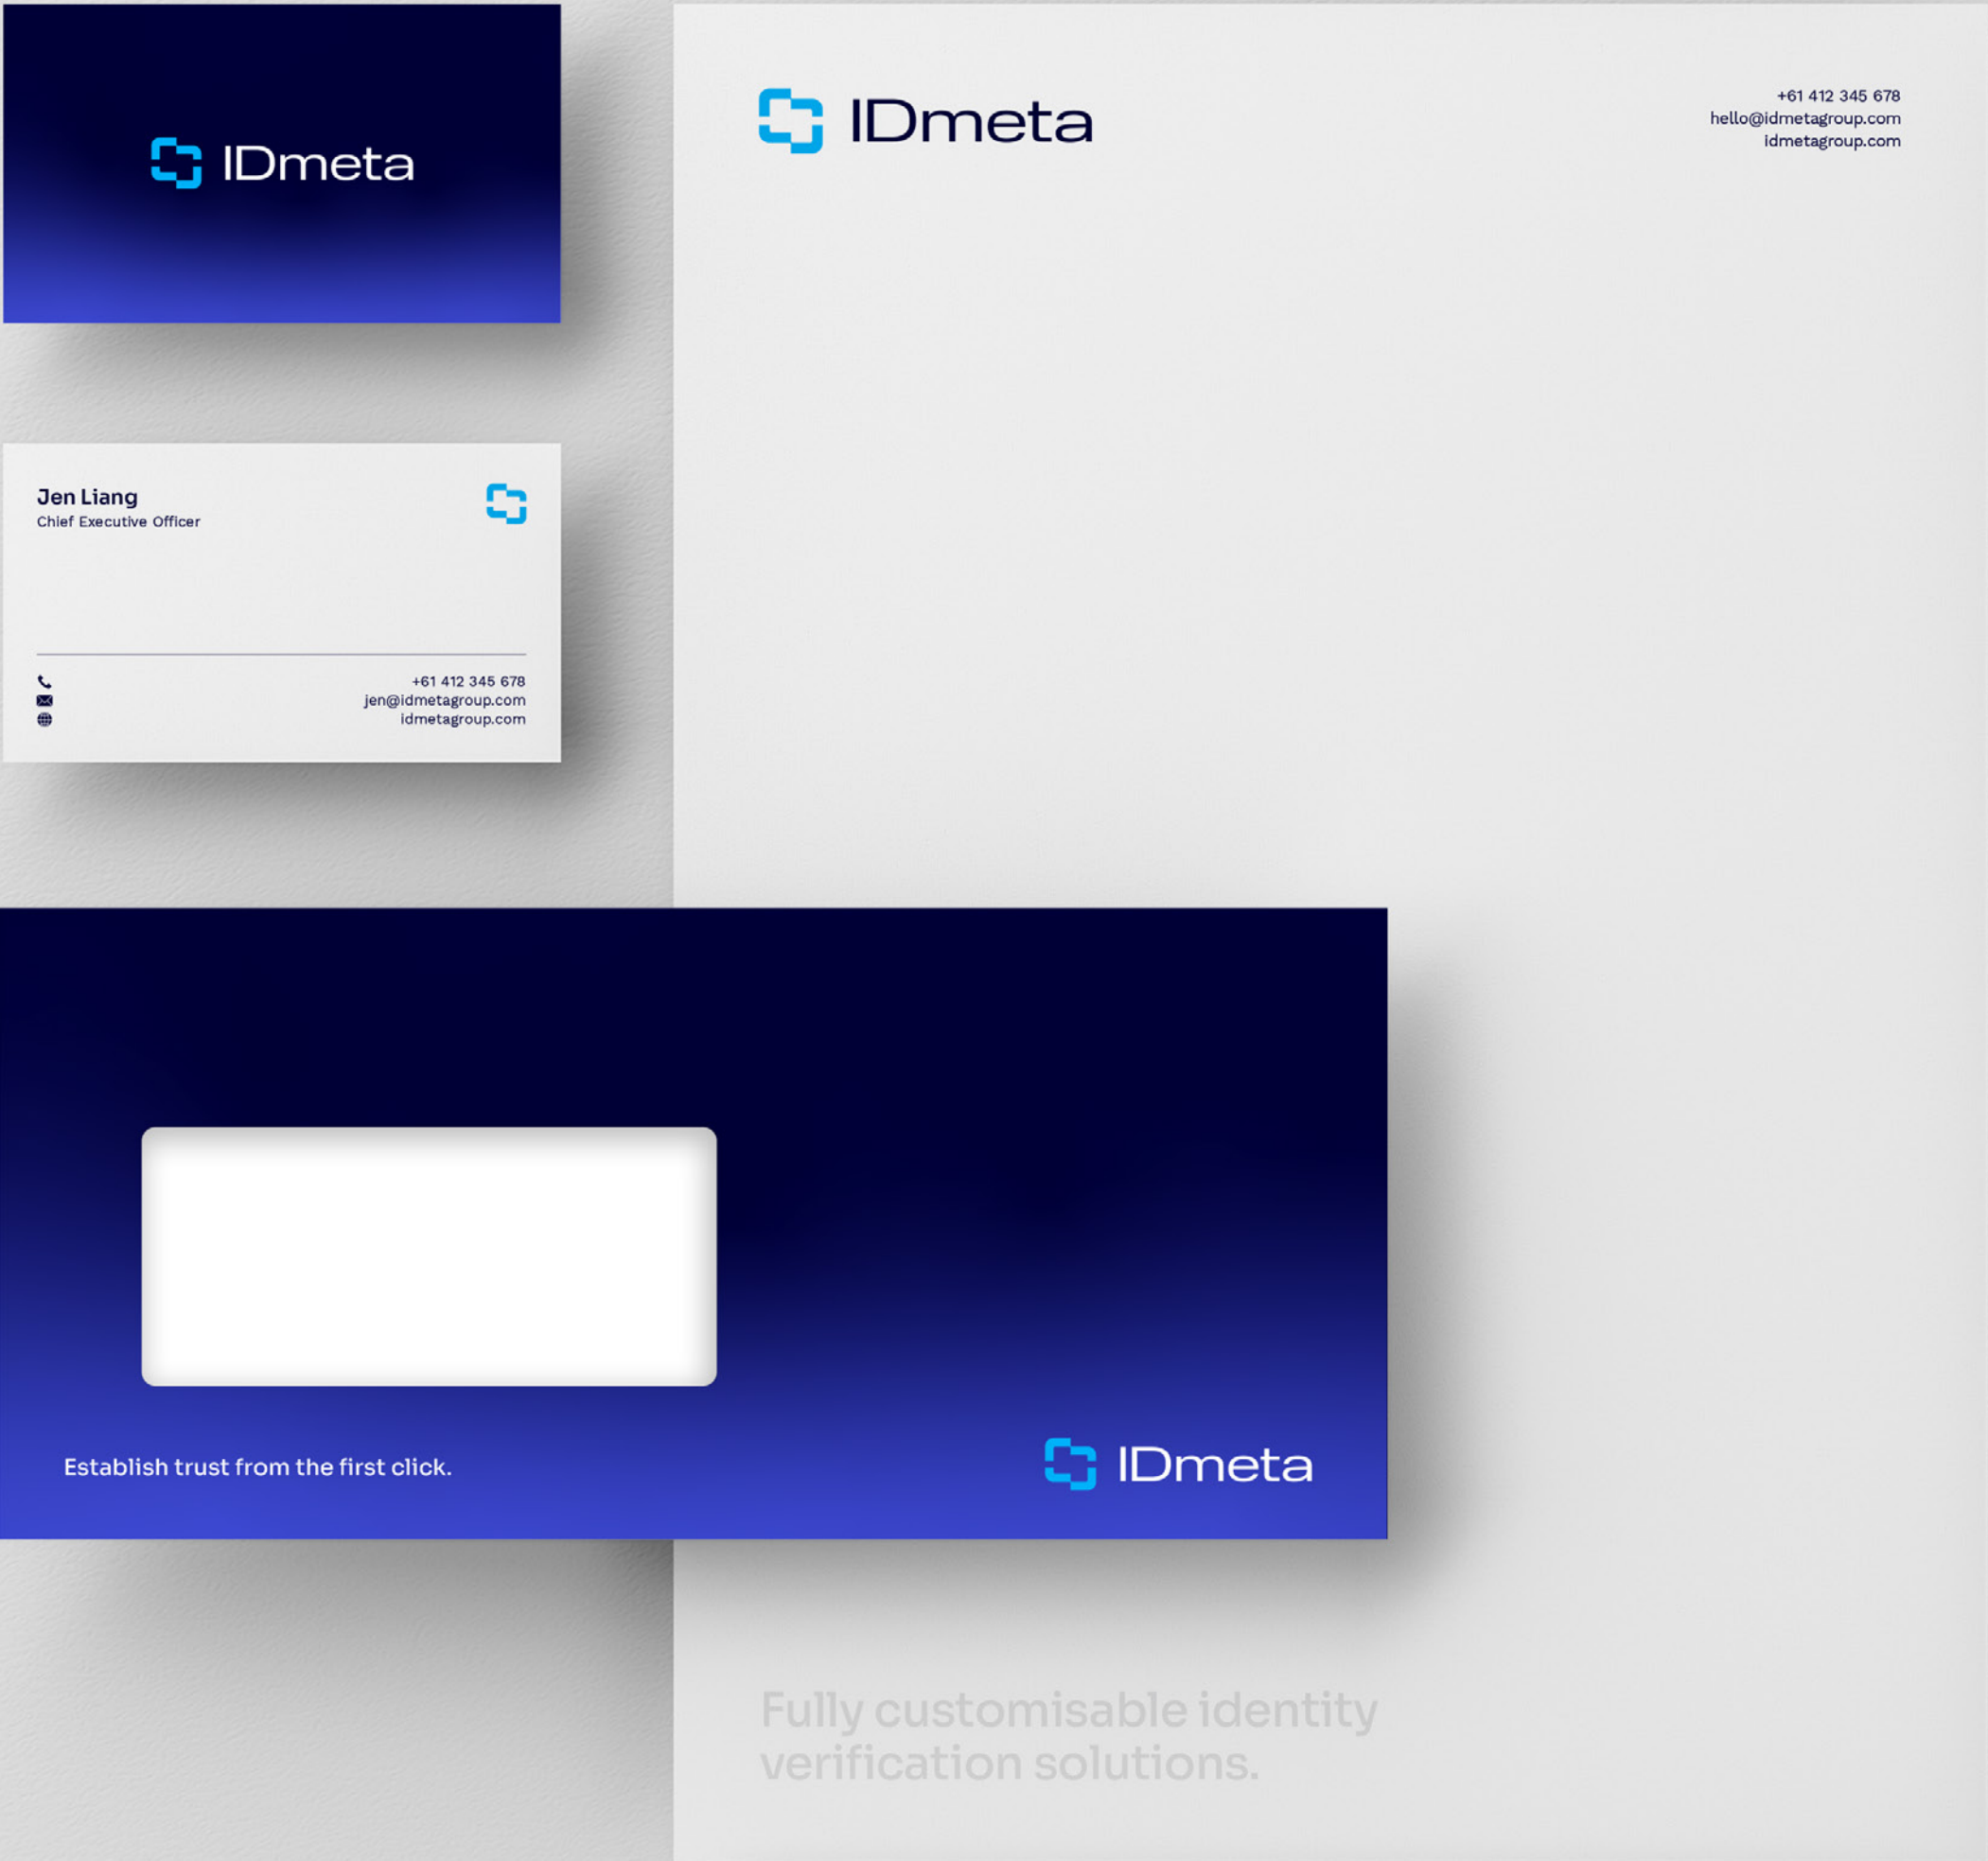

These gradients may be used across all applications.

Print

This is a demonstration of how the IDmeta brand may roll out across stationery.

These examples show how the brand can be applied in simplified ways across print applications focusing on colour and simplified layouts.

Print

This is a demonstration of how the IDmeta brand may roll out across print applications such as rock posters.

These poster examples show the flexibility of the brand and how the elements combine in various ways such as hard crops of imagery, large scale landmark and flexible type layouts.

These various layouts & setups may be used across all channels.

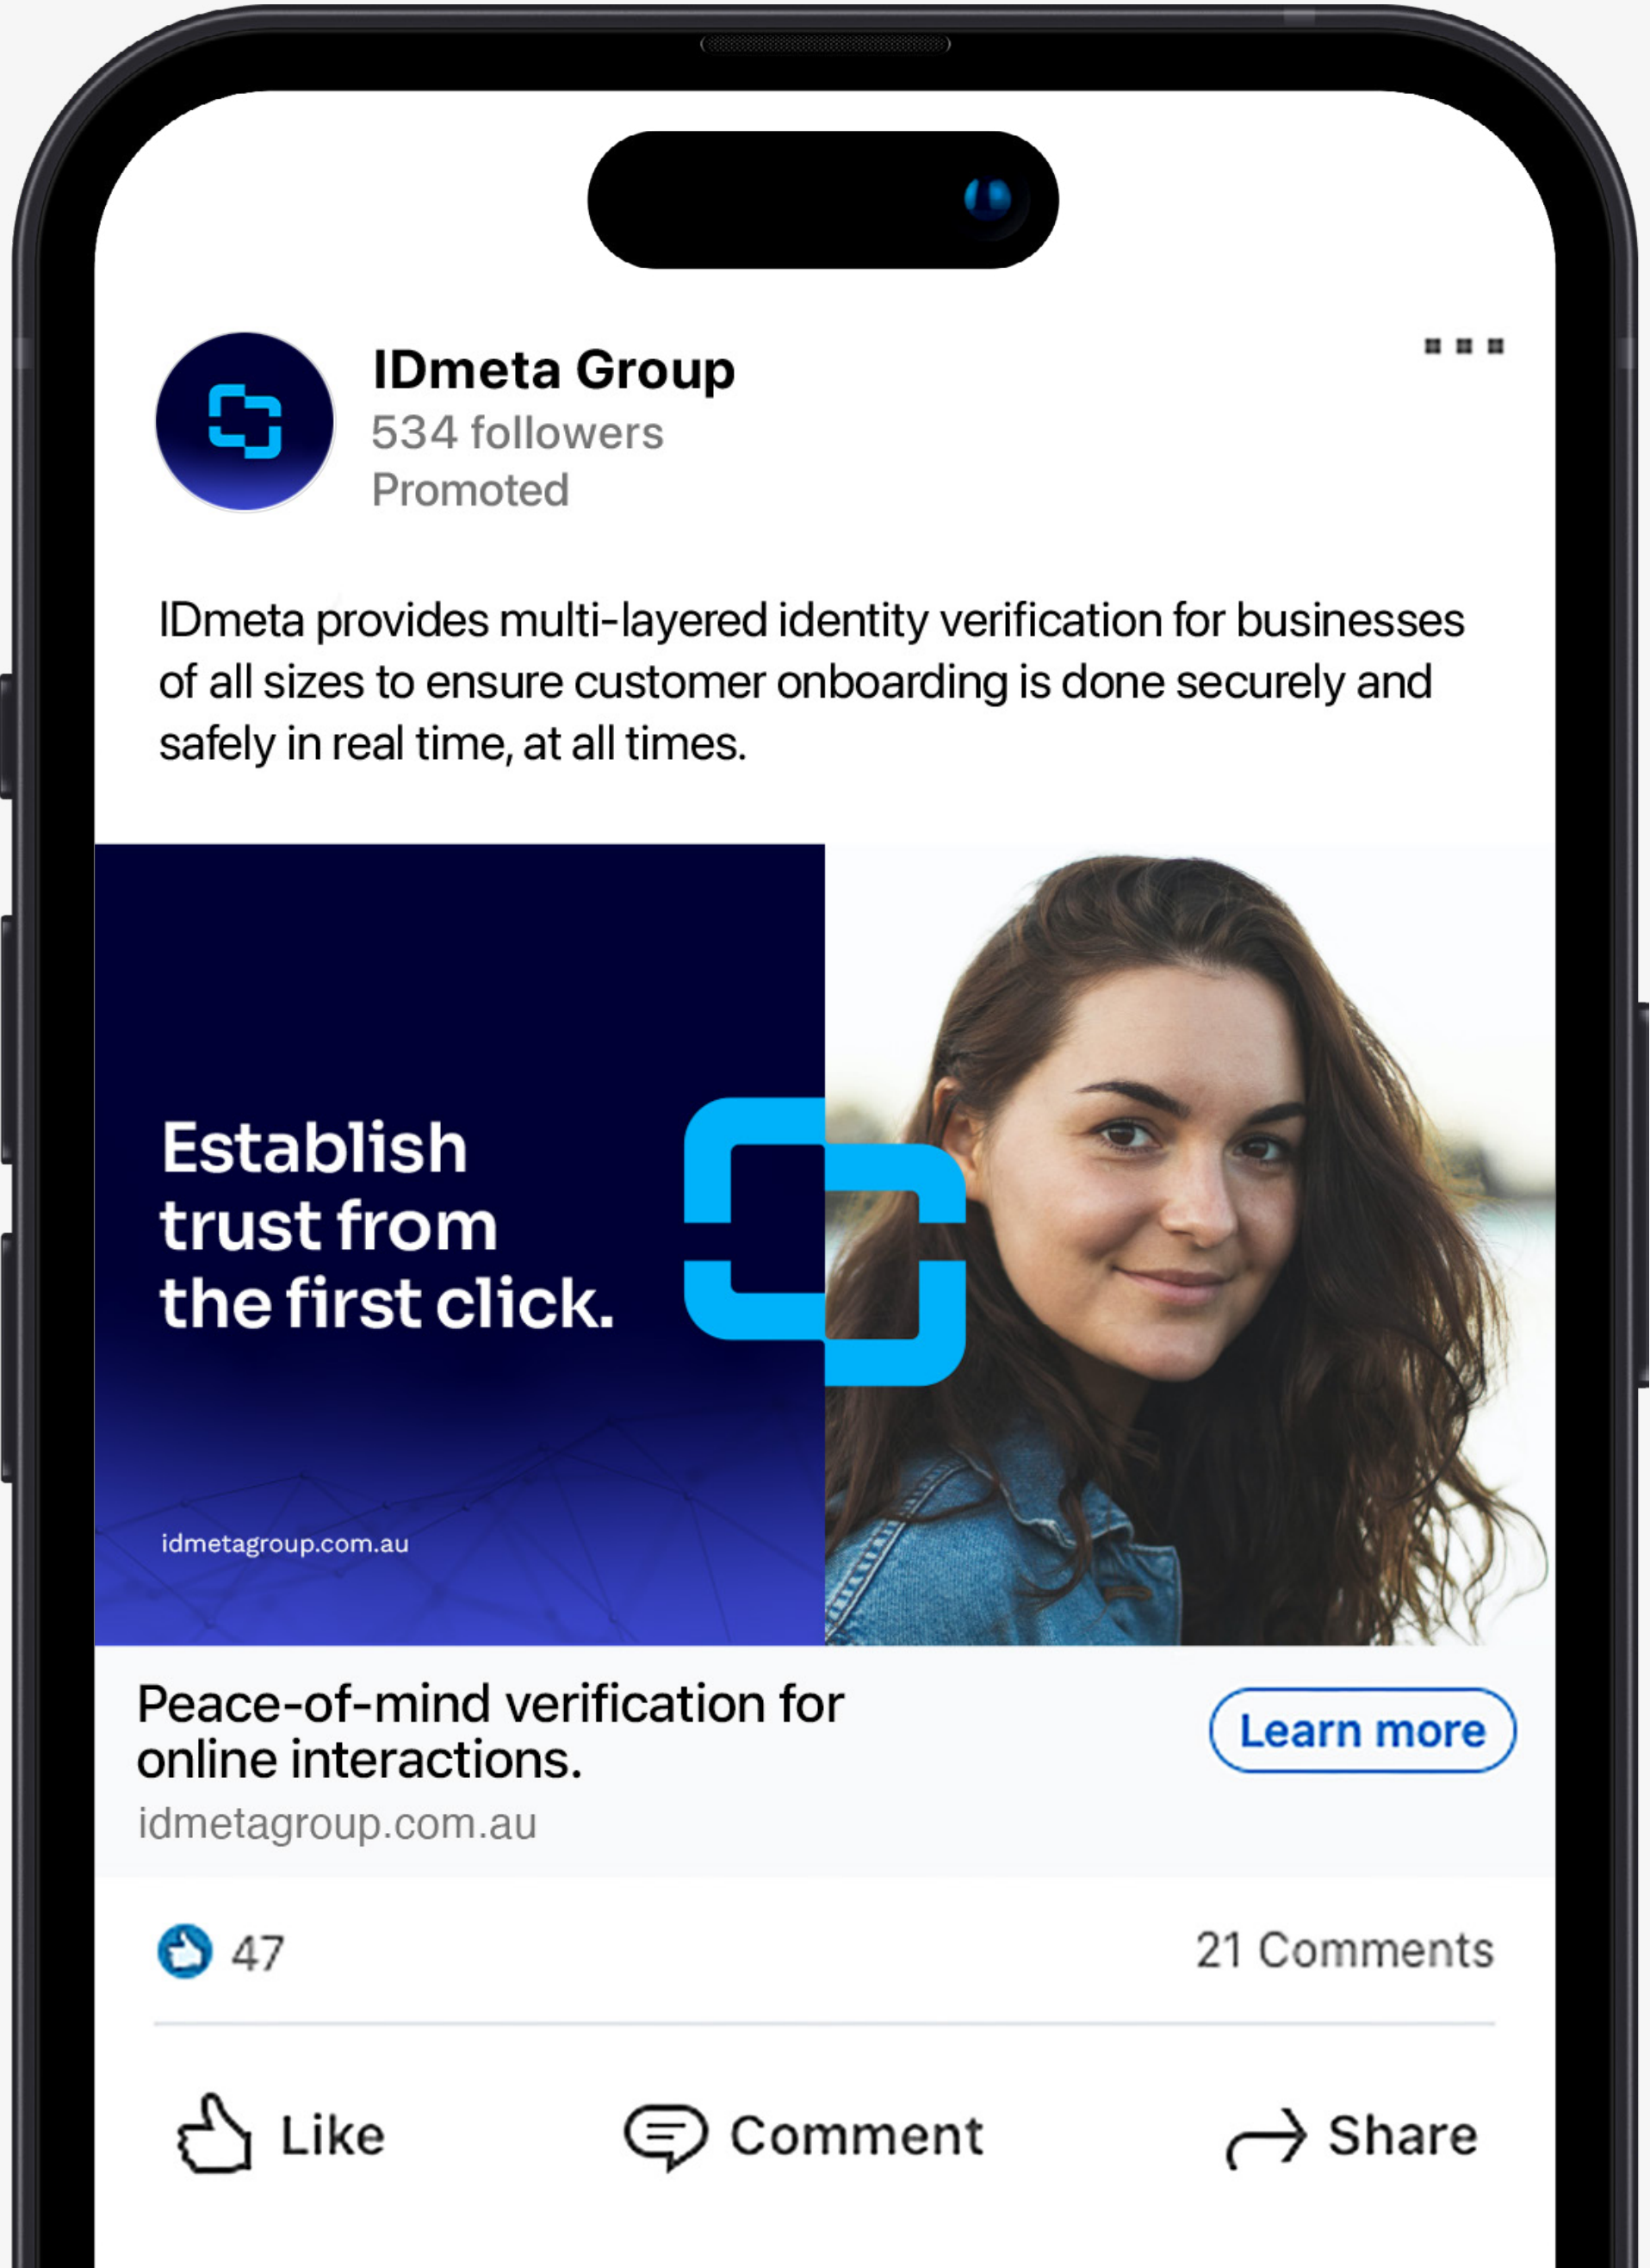

Digital

This is a demonstration of how the IDmeta brand may roll out across digital applications such as LinkedIn

This example shows the flexibility of the brand and how the elements may be used in various ways. The brandmark may be used as a tool for connecting different parts of the design, and the gradient may overlay imagery.

These treatments may be used across all channels.

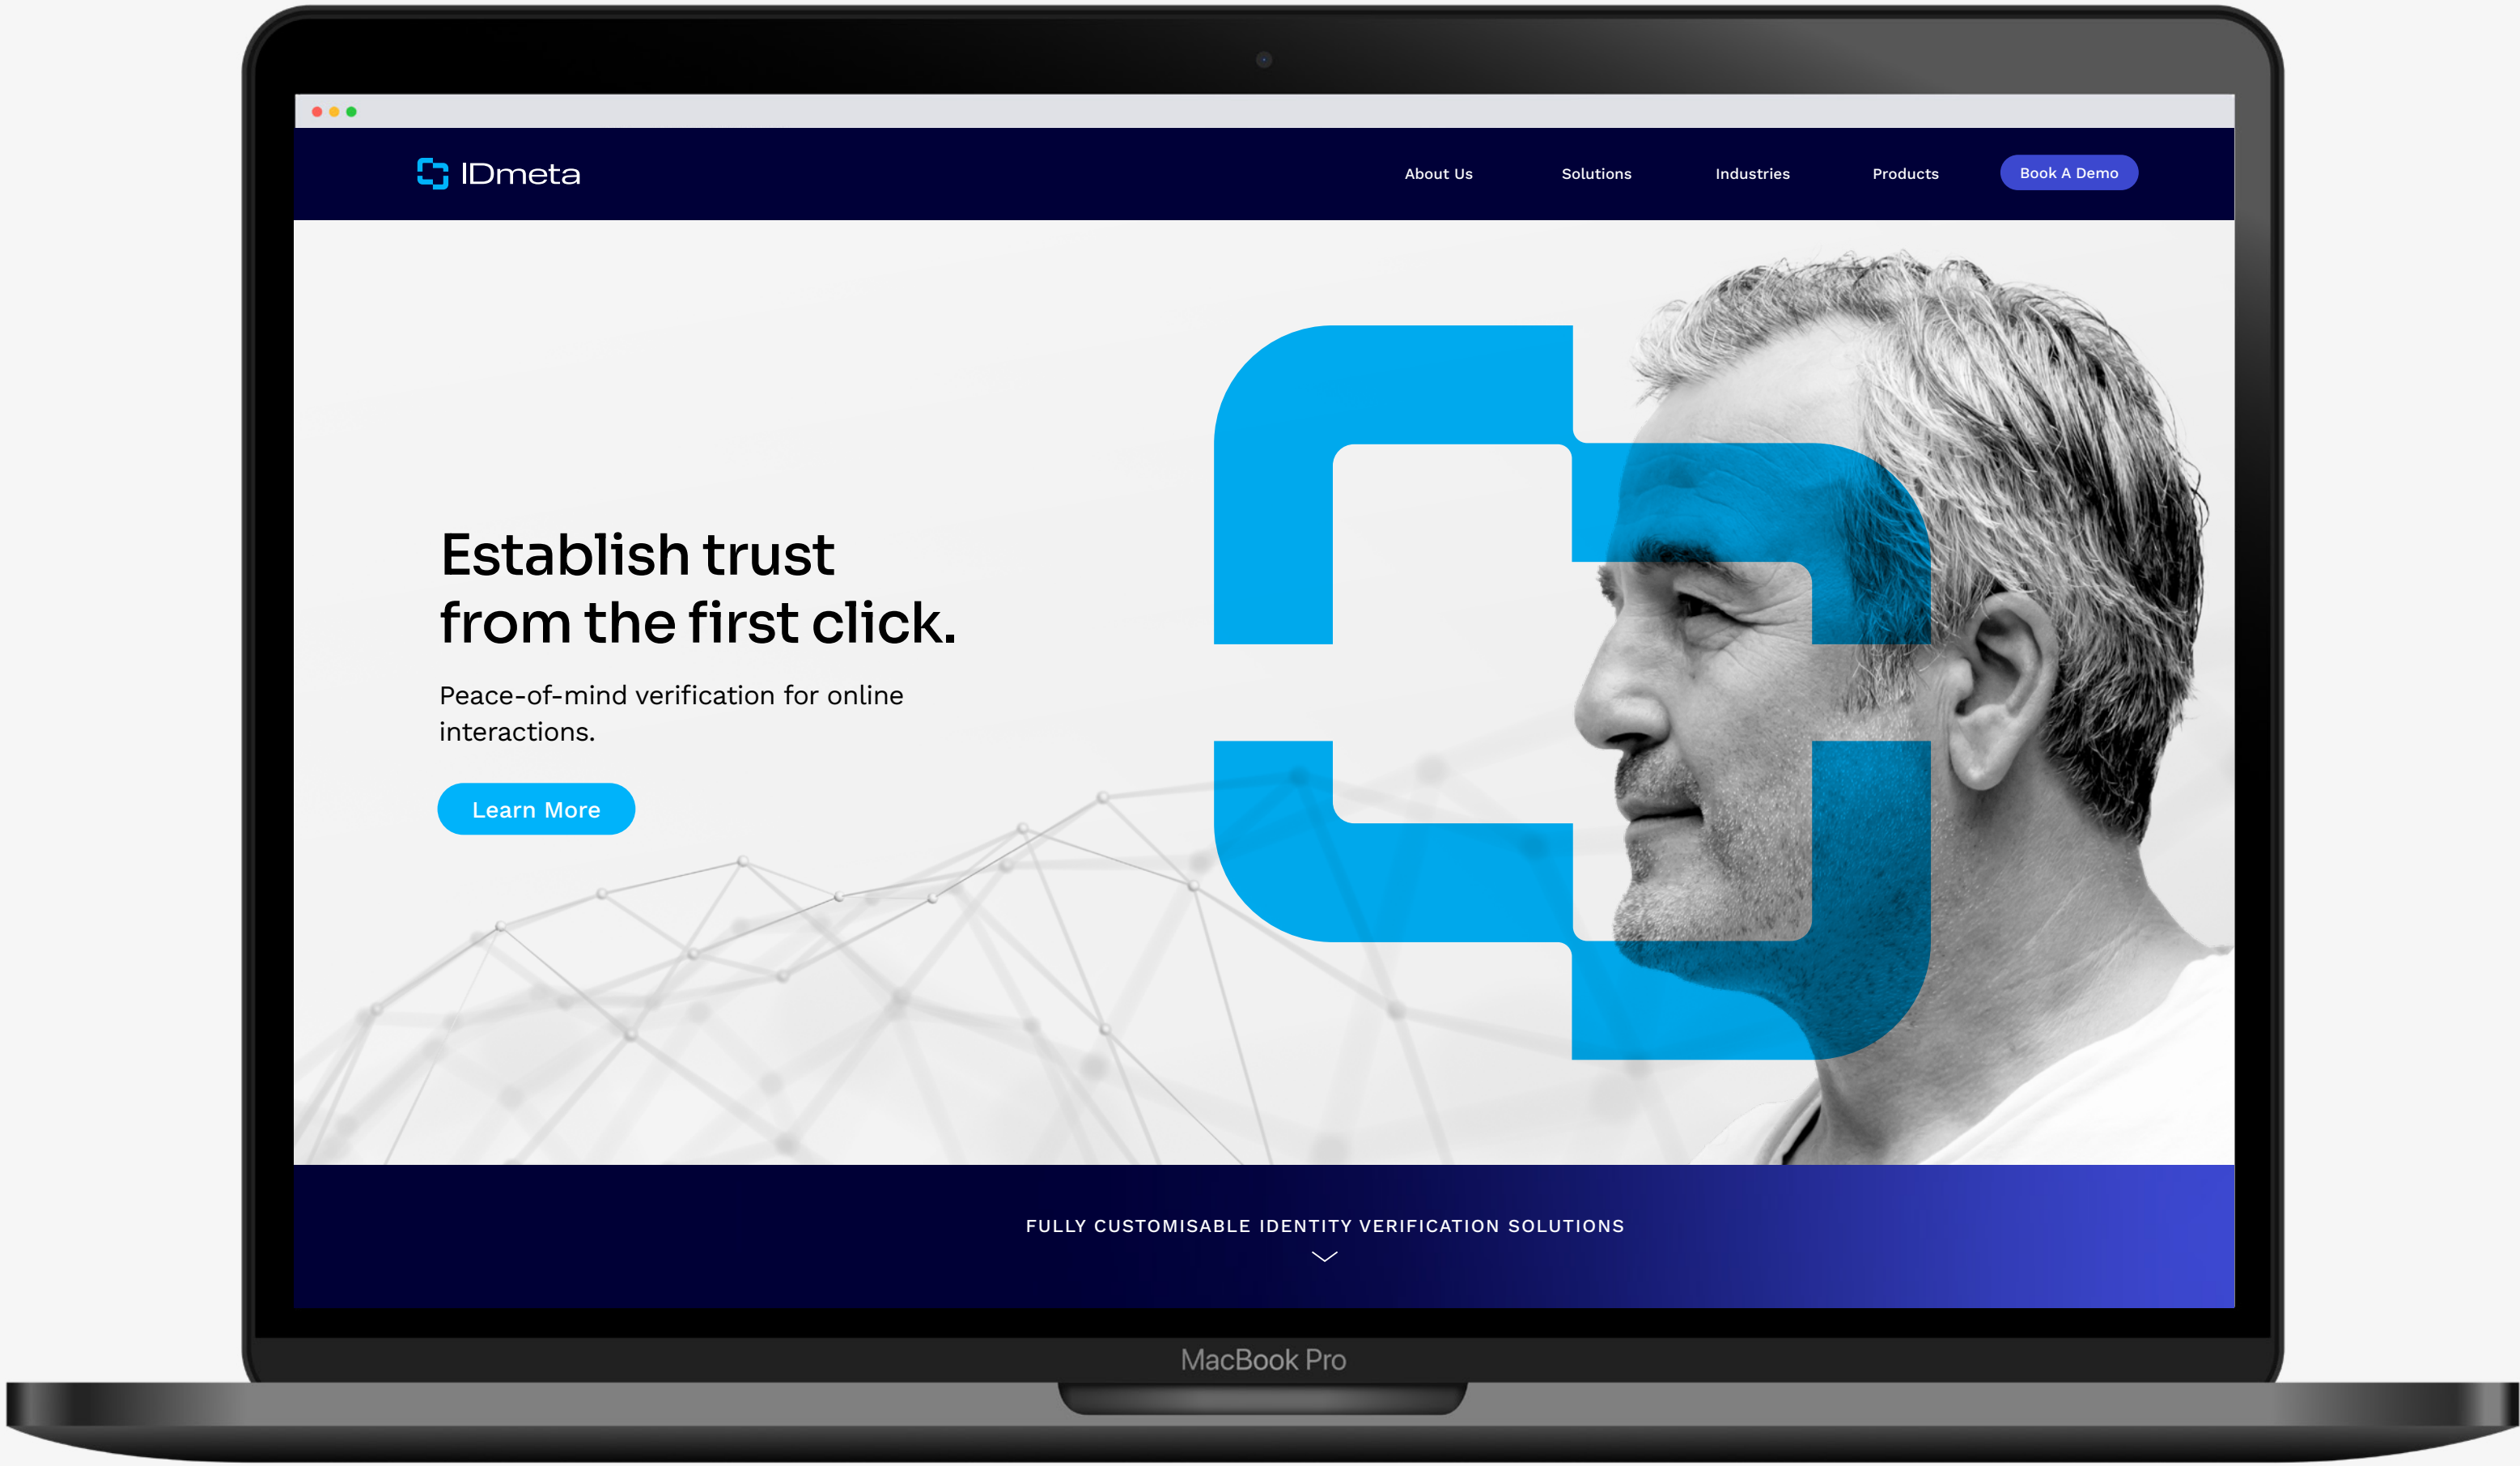

Digital

This is a demonstration of how the IDmeta brand may roll out across digital applications such as our website.

This example shows the flexibility of the brand and how the elements combine in various ways such as an overlay of imagery with the brandmark and flexible type layouts.

These treatments may be used across all channels.
